

We Bring The Solar System To You!

The Field Trip to the Planets That Comes to You!

Stargazing For Everyone's Professional Stargazers bring an interactive three dimensional solar system presentation to your school. Explore the Sun, Moon, planets, asteroids, and satellites with stunning realism. The use of high resolution animation of NASA images make the students feel as if they are really there.

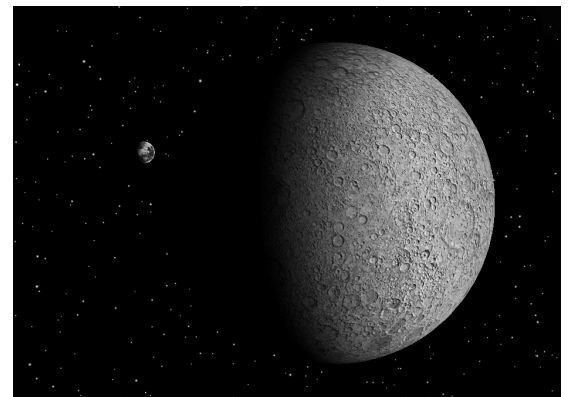

It's an experience you won't soon forget!

Each presentation educates, enlightens and provides a captivating 'edu-tainment' event for all grade levels wishing to enjoy the wonders of our solar system. Imagine viewing a lunar or solar eclipse from Earth orbit in real-time, explore the Galilean Moons of Jupiter, fly through the rings of Saturn or hitch a ride on Halley's comet.

All presentations are customized to match your school and classroom curriculum requirements and are aligned to the National Science and Arizona State Standards.

Appropriate for all grade levels. Great for grade level or all school assemblies; space science enrichment activities; outdoor education programs; and school family nights.
