# Teacher Workshops – Professional Development

## Exploring the Solar System and Beyond

Our training creates knowledge and awareness of astronomy in a way that engages teaching professionals and guarantees a lasting impression.

“The art of teaching is knowing how to stimulate students to feel the joy of learning.”

Robert F. Garrison

*Astronomy brings special challenges to a teacher:*

The 3-D nature of processes like the seasons and moon phases.

Frame of reference problems in understanding these processes.

Many complex and abstract topics.

The existence of deep-rooted misconceptions that are held by students and teachers alike.

Workshops and Professional Development sessions are taught by Astronomy Professionals

Presents current state of the science information

Learn techniques to overcome the unique challenges the subject material presents

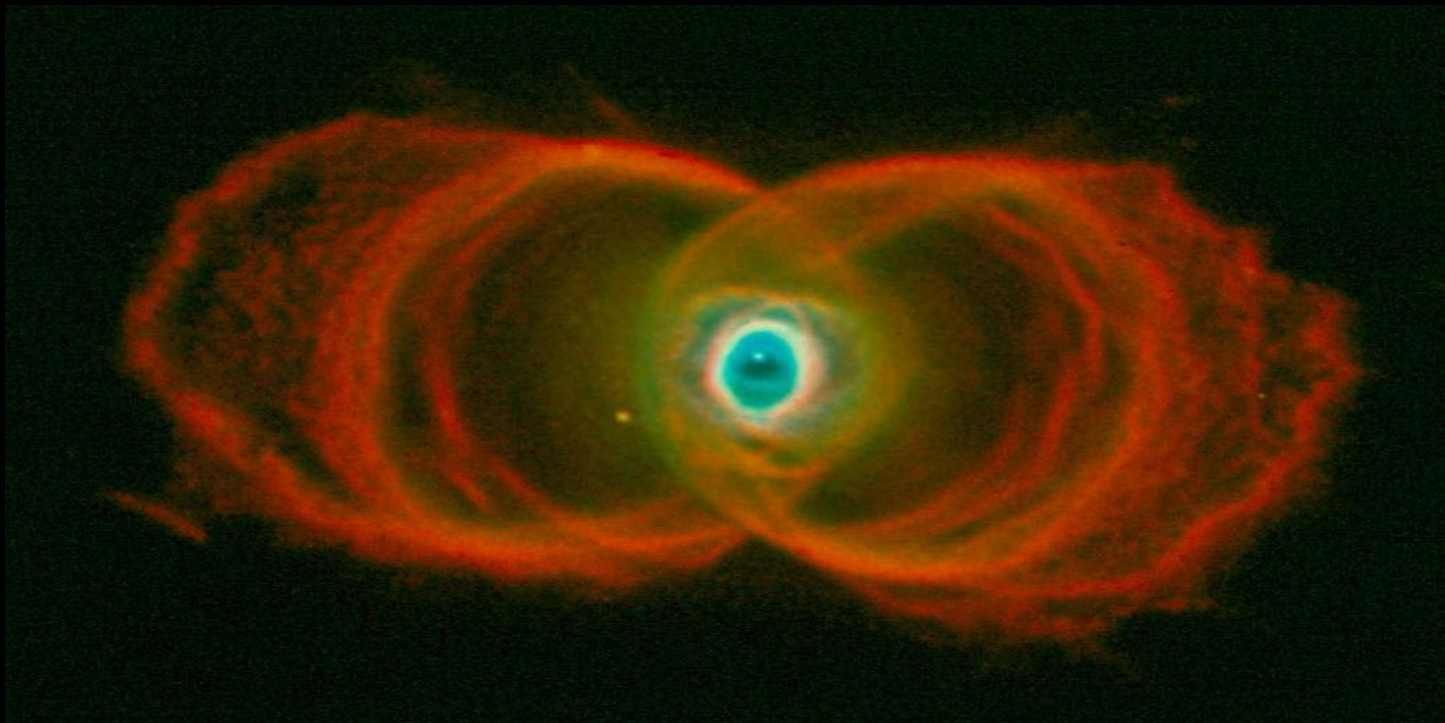

Learn to use readily available resources in the classroom

Learn to use interactive simulation technology

# Teacher Workshops – Professional Development

All sessions are aligned to the  
Arizona State Science Standards and  
National Science Standards.
